THE PROBLEM & THE USER

AI answers are the new search results, but brands can't track them

Who

- SEO & GEO managers and marketing leads at online brands
- Digital Marketing Agencies
- Brand & PR managers

What they do today

- Google each query
- Ask ChatGPT the same
- Check competitors
- Copy it into a spreadsheet
- Repeat every week

What it costs them

⏱️ Time: hours of copy-paste every week

👀 Blind spots: no idea what AI says about them

📉 Lost customers: competitors get recommended instead

Why it matters: If AI recommends your competitor instead of you, you lose the customer before they ever reach your website, and you never find out.

sound familiar? 😅

HOW IT WORKS

One form in, a checked report out

STEP 1
Trigger

DEMO RECORDING

THE RESULT

What the manager sees in 1 minute

Brand	Google · avg position		AI answers	Overall
Zalando	100%	#4.5	100%	100%
ABOUT YOU	75%	#1.3	50%	63%
ASOS	0%	—	75%	38%
H&M	0%	—	50%	25%
Shein	0%	—	25%	13%

% = share of 4 questions where the brand is in Google's top 10, or named in the AI answer. Avg position: #1 is best.

🤖 **AI loves Zalando:** Named first among tracked brands in all 4 AI answers

🔎 **Google prefers ABOUT YOU:** It ranks above Zalando when people search "best online fashion store Germany" or "where to buy clothes online with free returns"

👀 **Hidden competitors:** AI also recommends OTTO, Mango, Foot Locker and Snipes, brands Zalando isn't tracking

📚 **Sources:** Serper (Google results) · OpenAI (AI answers) · NewsAPI (news) · Google & GEO guidelines

⚠ **Flags:** no relevant news found for ABOUT YOU · no API errors · fact-check passed (0 fixes)

TECHNICAL SPECIFICATIONS

Built for reliability, not just a demo

Part	What we use	Its job
⚙️ Orchestration	n8n (primary)	Runs every step after the form is sent
🧠 Fact-check	LangGraph, hosted on Render	Checks every claim against the data, fixes errors
🤖 AI model	OpenAI GPT models + embeddings	Checks AI answers, writes the report
🔌 Data sources	Serper · OpenAI · NewsAPI	Live facts: Google results, AI answers, news
📚 Grounding	Pinecone (RAG)	Bases advice on Google & GEO guidelines
📧 Delivery	Gmail: HTML email + report file	Gets the report to the user's inbox
🛡️ Error handling	Input limits, retries, fallback	An API fails → no crash, no guessing

Why n8n: A clear step-by-step flow with built-in APIs, RAG, retries and email, that marketing teams can run and adapt without code. **LangGraph** only powers the fact-check loop.

COST PER REPORT ≈ a few cents*

TIME PER RUN ~2–3 minutes

*Estimate: OpenAI calls only; Serper and NewsAPI run on free tiers.
